

Company

JUST GRAB IT

MARCHESI GRU was established in 1968 and now its customers can rely on an over 40 years' experience in the construction of truck-mounted loading cranes.

Over the years, this company has been recognized for its high quality standards, leading to a brand that is now the best solution for all those who need a loader crane able to fulfil any handling requirement.

We consider our mission the engineering and manufacturing of heavy-duty cranes for Recycling and Timber handling.

Our product range is structured in two main product lines, displayed on two different brochures to effectively focus on each technical features.

Please have a look of our new timber brochure.

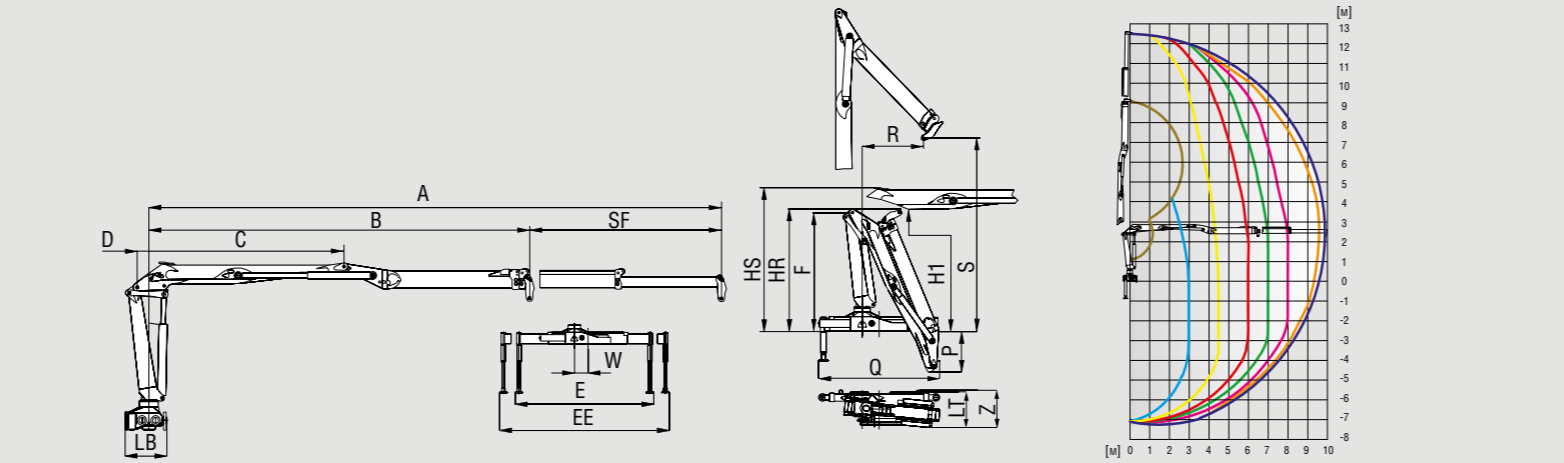

Highlights:

- Remarkable heights and loading capacities under the column in combination with max. outreach;
- Exceptionally ergonomic seat with cross and height adjustment;
- Extremely high net rotation torque and angle

values obtained from simple or double rotation. This has been achieved through accurate research and use of special materials.

- Use of steel with high structural yield;
- Casehardened and tempered pins and bushings;
